

[Submission Number 047](#)

**What organisation (if relevant) are you from?**

████████████████████

**Please enter your first name:**

██████

**Please enter your email address:**

██

**To what extent do you agree or disagree with the Panel's key findings and recommendations, and why? Please provide as much detail as possible.**

this is all ████████. For only 2 of the panel members to attend the hearings just shows that the panel already had a pre conceived out come. Your report was not a reflection of the meeting I attended in shepparton and else where. all these reports do is give the governments a tick to say that the've consulted with community

**Are there any significant gaps? What are we missing?**

you never once put a dollar figure to the loses districts and the country have occurred

**If implemented, do you think our recommendations would make a difference or have a benefit to you and/or your community?**

the recommendations you make will only take more water away and further destroy our communities and give big business another bullet to shoot us with

**To what extent do you agree or disagree with the Panel's key findings and recommendations, and why? Please provide as much detail as possible.**

you are not looking at where water is being wasted. if those losses were saved it would provide more water for agriculture and communities

**Are there any significant gaps? What are we missing?**

not looking at losses

**To what extent do you agree or disagree with the Panel's key findings and recommendations, and why? Please provide as much detail as possible.**

need full transparency
