

## Trangie Nevertire Irrigation Scheme and Trangie Nevertire Co-operative Ltd

### Delivery Entitlement Permanent Transfer Rules.

1. In general, Delivery Entitlements are transferrable within the TNIS / TNCL channel system, upon application to the TNIS /TNCL Boards. Transfers must be to land portions that are included within the TNIS Works Approval and be accompanied with the transfer of the corresponding number of TNCL shares.
2. Transfers upstream are generally allowable without restriction.
3. Transfers downstream or to another channel branch are subject to channel capacity restraints and will be considered by TNIS/TNCL on a case by case basis. Flow restrictions may be applied to protect the flow rates of existing Members on these branches.
4. All costs (if any) of the transfer, including any changes to the channel infrastructure, are to be paid by the transferring Members.
5. All Delivery Entitlements must be delivered through an approved metered farm outlet.
