(1) This Agreement shall apply to all lands and to all groundwater within the Designated Area.

(2) For the purposes of this Agreement, the potentiometric surface levels of groundwater within any zone shall be determined by reference to, and shall be deemed to be as at 1 July 1982, as indicated in the Third Schedule.

Subject to the provisions of this Agreement—

(a) the provisions of the South Australian Water Resources Act 1976 and of regulations made thereunder shall apply to such portion of the State of South Australia as is within the Designated Area.

(b) the provisions of the Victorian Groundwater Act 1969 and of regulations made thereunder shall continue to apply to such portion of the State of Victoria as is within the Designated Area—

Subject to clause 28 no application for a permit shall be granted and no permit renewed—

(a) in relation to the construction, deepening, enlarging or altering of any bore which passes or will pass through two or more aquifers unless a condition is attached to such permit which requires that an impervious seal be made and maintained between such aquifers;

(b) in relation to the construction, deepening, enlarging or altering of any bore, or the extraction of water from any bore, in any zone where the effect of extracting water from that bore would be to exceed the permissible annual volume for that zone;

(c) in relation to the construction, deepening, enlarging or altering of any bore, or the extraction of water from any bore, in any zone if that bore is situated within, or proposed to be situated within, a distance less than the permissible distance from the border between the State of South Australia and the State of Victoria for that zone unless the Committee has first considered the matter and determined that such application may be granted or such permit may be renewed; or
(d) in relation to the construction, deepening, enlarging or altering of any bore, or the extraction of water from any bore, where the bore is situated in, or proposed to be situated in a zone where the average annual rate of potentiometric surface lowering has exceeded the permissible rate of potentiometric surface lowering over the preceding five years.

27. Preparation of reports.

(1) As soon as practicable after 30 June in each year, each contracting Government shall in relation to the zones within its respective jurisdiction cause to be prepared a report stating—
   (a) the number of permits granted or renewed in each of those zones in the preceding year ending on 30 June;
   (b) the annual volume of extraction which has been authorised in relation to each such permit;
   (c) the total number of bores situated in each zone in the preceding year ending on 30 June;
   (d) details of the potentiometric surface levels obtained from observation bores within each zone in the preceding year ending on 30 June; and

   (a) the permissible distance from the border between the State of South Australia and the State of Victoria; and
   (b) the permissible annual volume of extraction—
   in relation to each zone and shall have the power to alter either or both of the same in relation to any zone.

   (a) the permissible rate of potentiometric surface lowering; and
   (b) the permissible levels of salinity (if any) established pursuant to sub-clause 28(6)—
   in relation to each zone and if the Committee is satisfied that any alteration to either or both of the same is desirable in relation to any zone, it may recommend any such alteration to the Minister of each Contracting Government.
(4) Where the Minister of each Contracting Government agrees with any such recommendation, the permissible rate of potentiometric surface lowering or the permissible level of salinity, or both as the case may be, for any zone shall be deemed to have been altered in accordance with any such recommendation.

(5) The Committee may at any time recommend to the Minister of each Contracting Government that a permissible level of salinity be declared for any zone.

(6) Where the Minister of each Contracting Government agrees with any such recommendation, a permissible level of salinity shall be deemed to have been declared for that zone in accordance with such recommendation.

29. Periods of restriction.

(1) Whenever in the opinion of the Committee it is necessary or desirable for the better investigation, use, control, protection, management or administration of groundwater within the Designated Area, it may by resolution declare a period of restriction in relation to any zone.

(2) A period of restriction may be declared for any period not exceeding five years and may be renewed from time to time for any further period not exceeding five years.

(3) A period of restriction may be declared in relation to any zone notwithstanding that the permissible annual volume or the permissible level of salinity (if any) or the permissible rate of potentiometric surface lowering for that zone, or any or all of them, has not been exceeded in any previous year.

(4) During any period of restriction no application for a permit shall be granted and no permit renewed in relation to the construction, deepening, enlarging or altering of any bore, or the extracting of water from any bore in any zone to which the period of restriction relates unless—

   (a) the details of the application or of the proposed renewal have first been considered by the Committee;

   (b) the granting authority has first considered any recommendation made by the Committee with respect to the application or the proposed renewal; and

   (c) thirty days have elapsed from the date on which the details of the application or of the proposed renewal have been considered by the Committee.

30. Annual report.

(1) As soon as practicable after 30 June in each year, the Committee shall prepare a report on its activities during the year ended on the preceding 30 June.
